SIMPLE BANKING SYSTEM

Test Case Execution Screenshots

Python Programming Project – PS No. 12

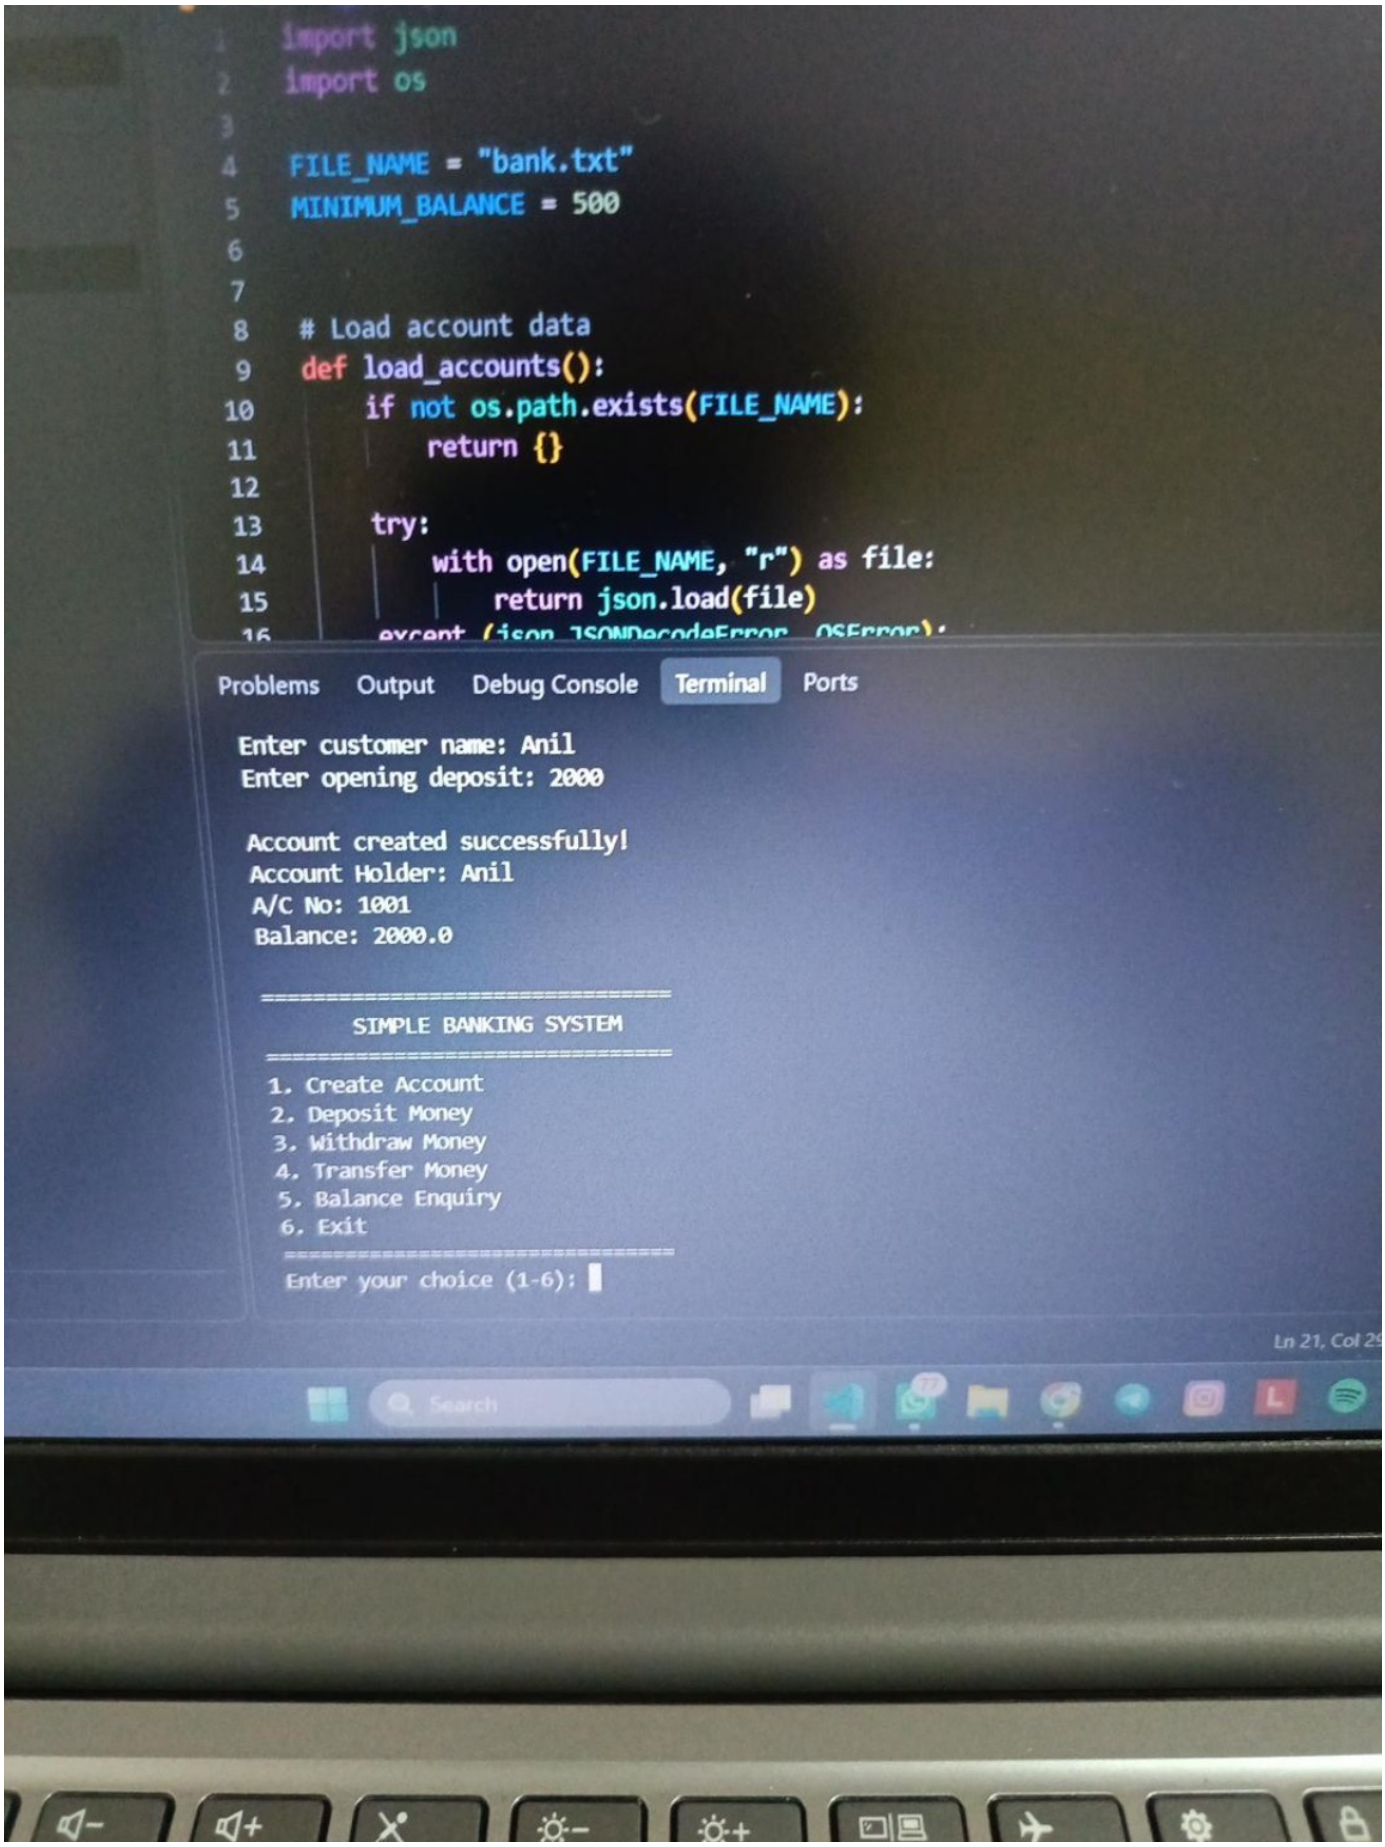

BCA – AI & ML | Rungta International Skills University

Developed by: Rohit Kumar Upadhyay

This document contains photographs of the program output captured during execution of the four required test cases.

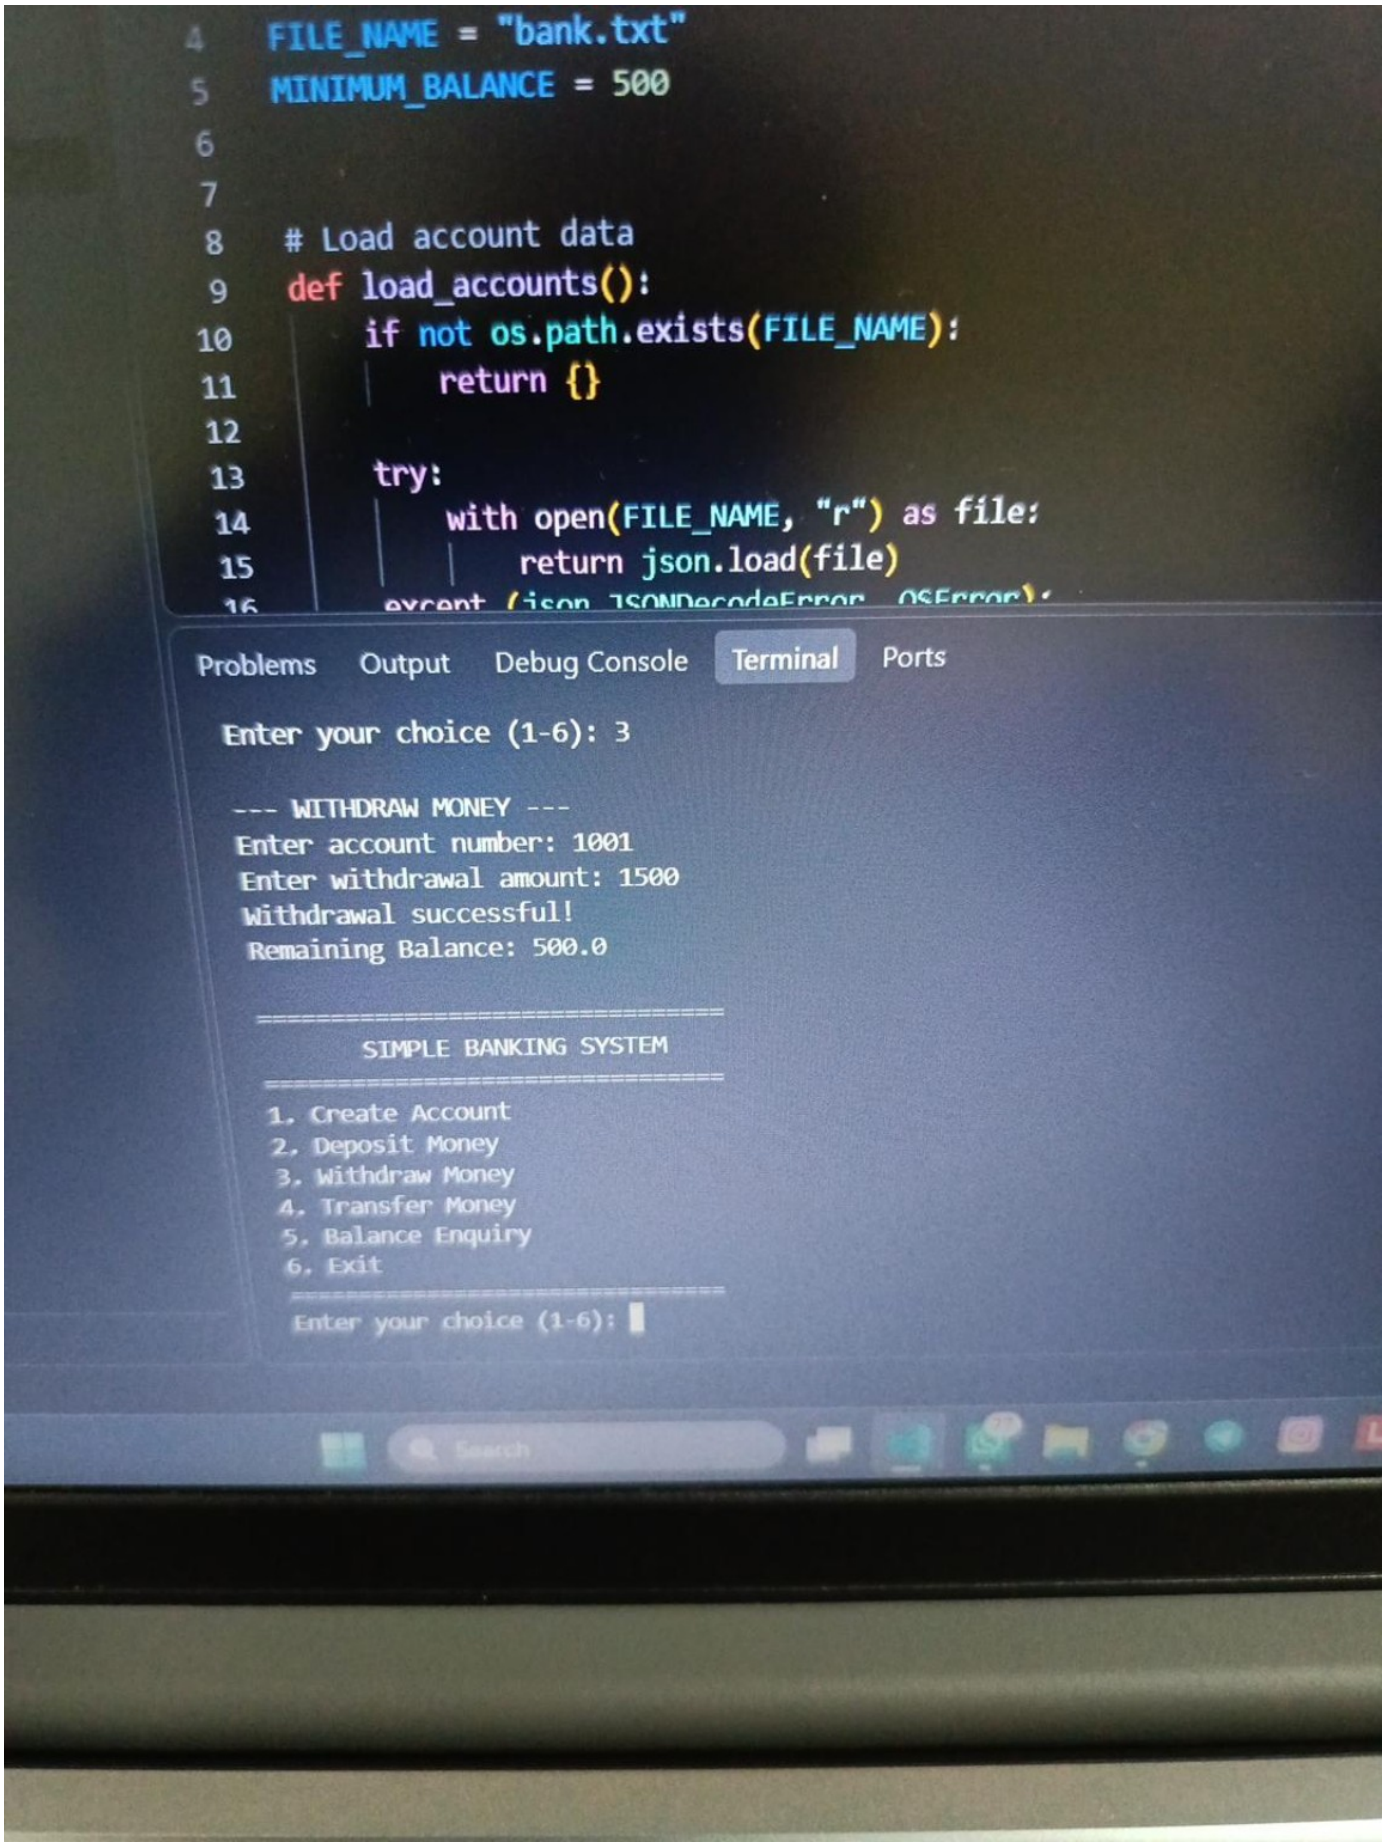

Test Case 1 – Account Creation

Anil's account is created successfully with account number 1001 and an opening balance of ■2,000.

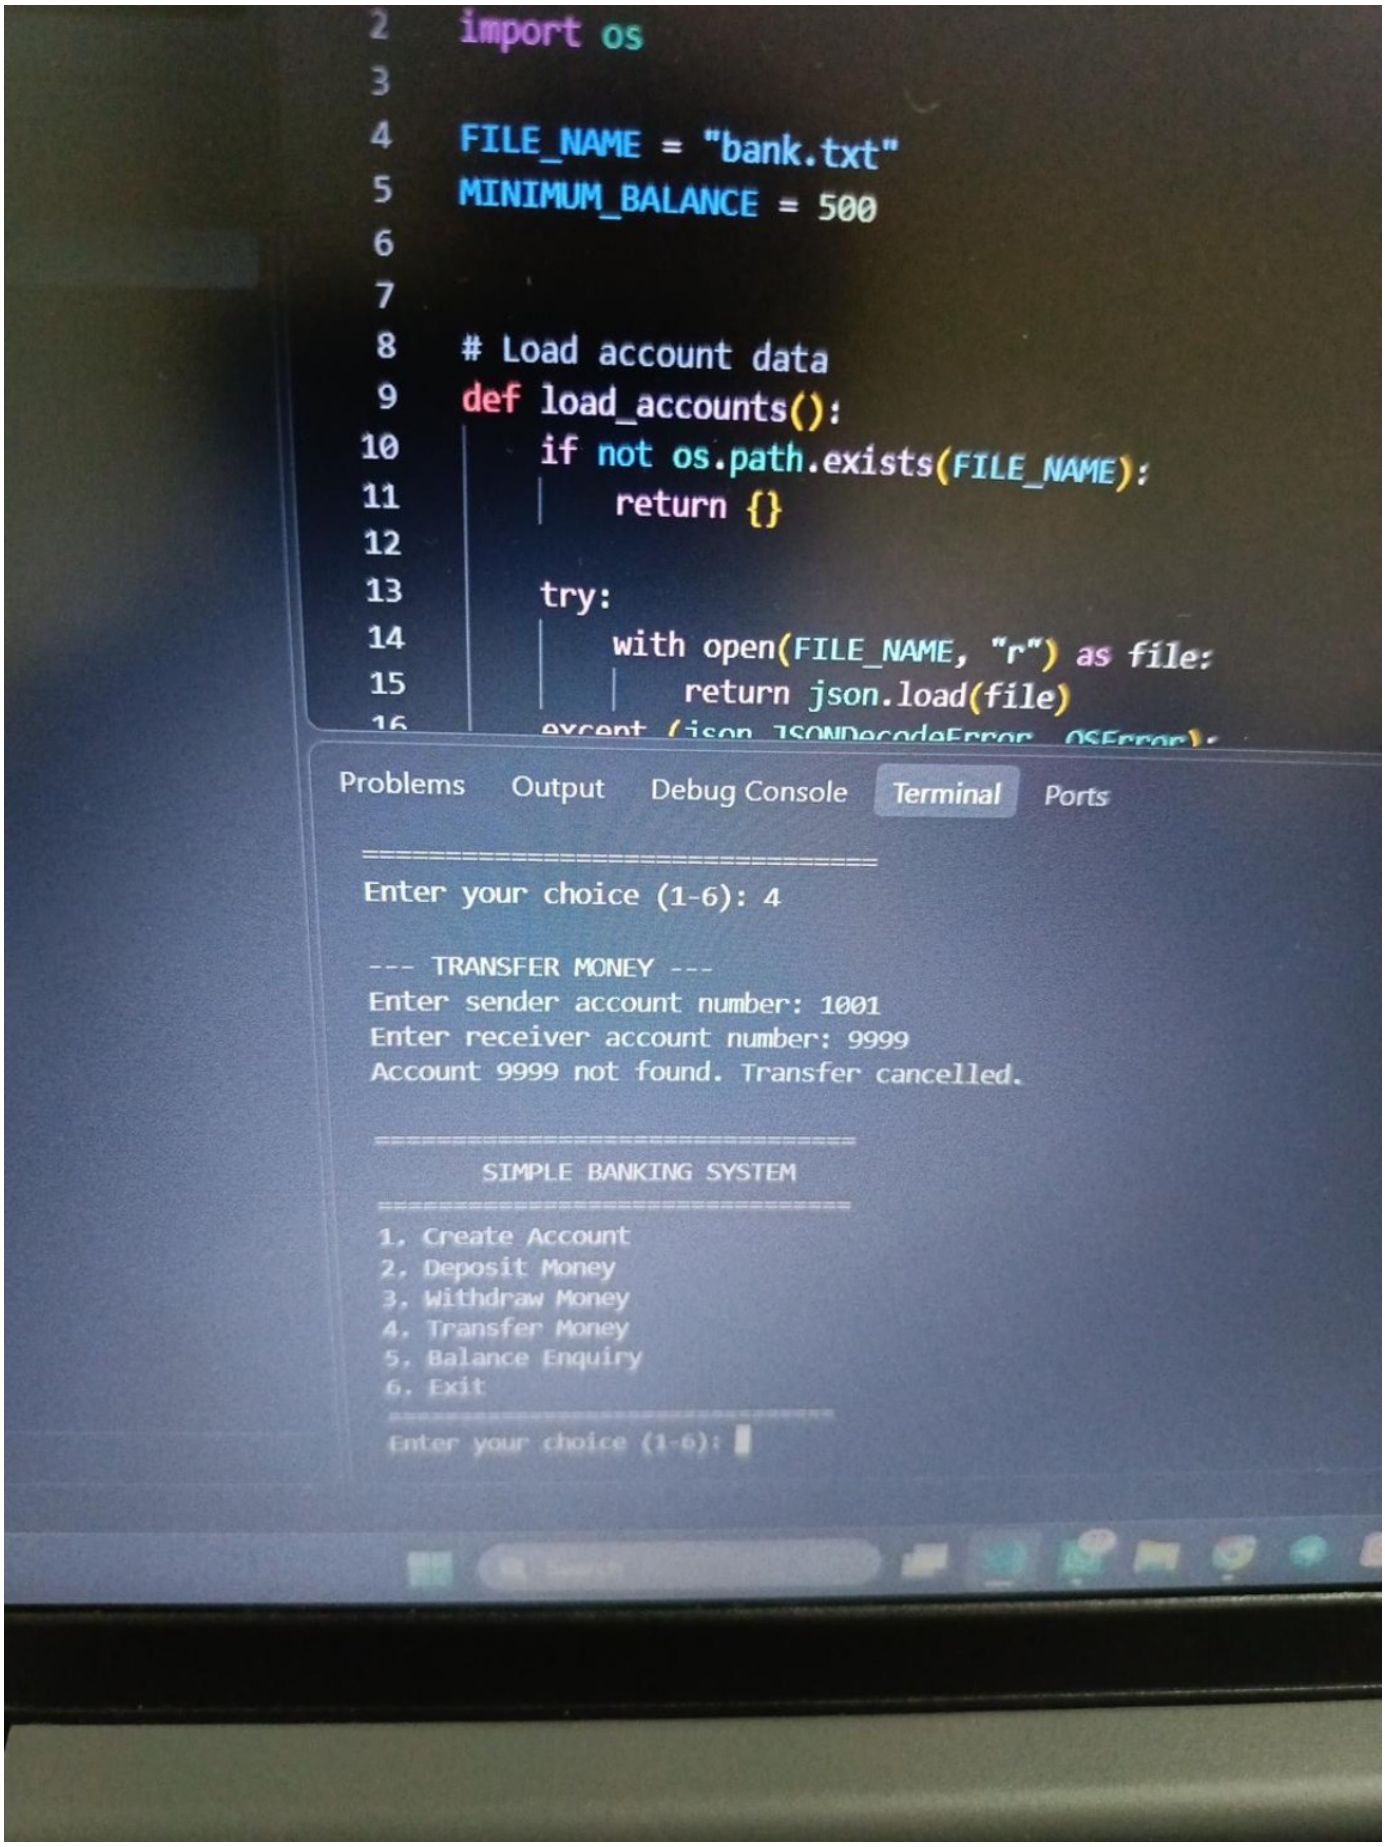

Test Case 2 – Withdrawal

■1,500 is withdrawn from account 1001. The remaining balance is ■500.

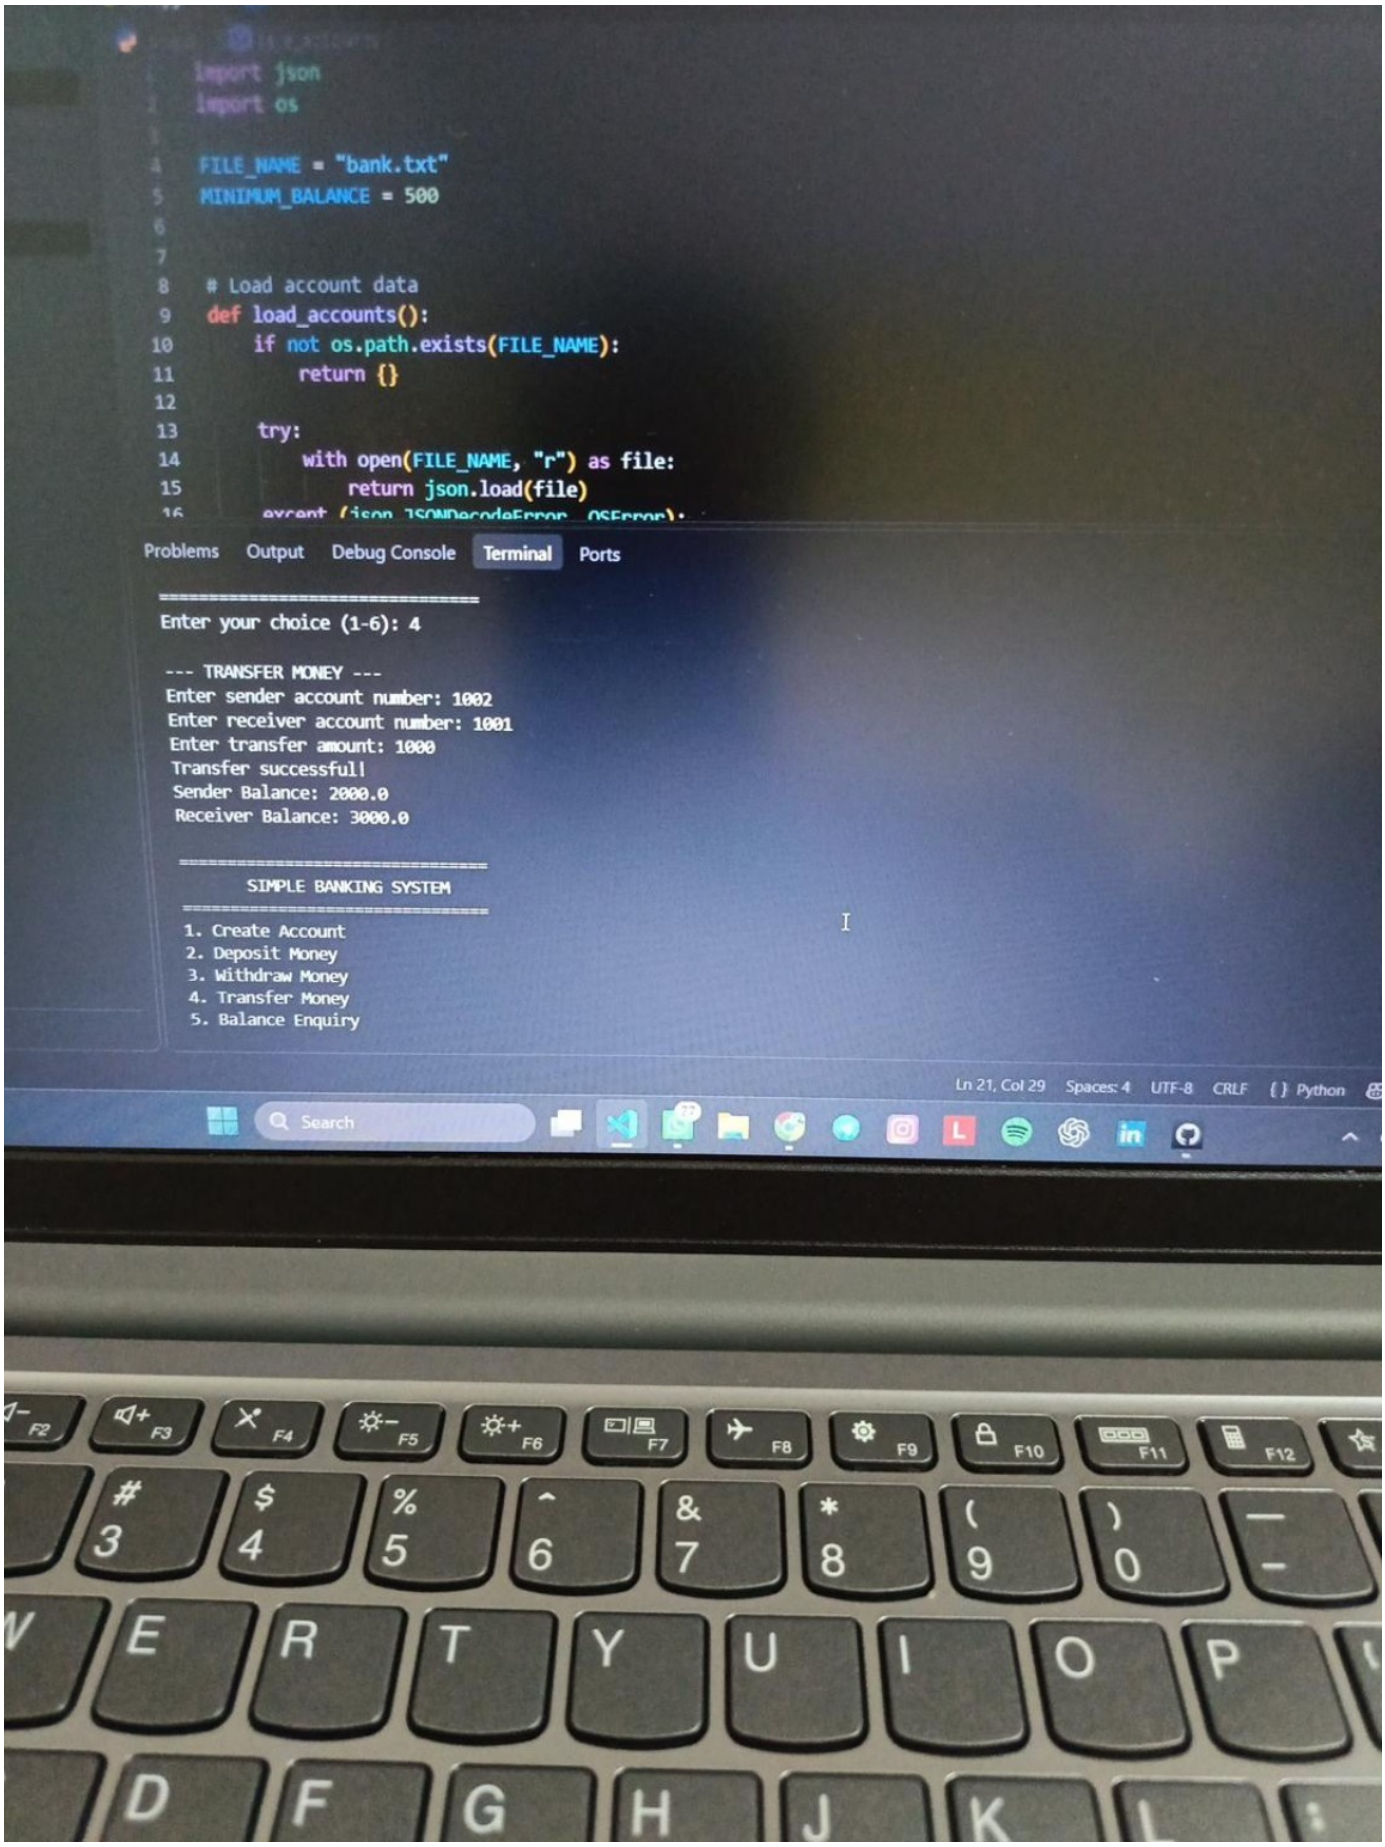

Test Case 3 – Invalid Transfer

A transfer of ■100 to non-existent account 9999 is cancelled.

Test Case 4 – Successful Transfer

■1,000 is transferred from account 1002 to account 1001. Sender balance: ■2,000; receiver balance: ■3,000.

Test Case 4 – Balance Enquiry

Balance enquiry for account 1001 confirms an available balance of ■3,000.
